## ABOUT ME

WordPress Developer with experience in creating and customizing themes, managing plugins, and building responsive websites. A Software Engineering graduate focused on front-end development, skilled in HTML, CSS, and Bootstrap. Passionate about clean, user-friendly design and eager to grow through real-world projects.

## EDUCATION

Bachelor of Science in Software Engineering (Completed: 28 Jan 2025)

Islamia University Bahawalpur, Pakistan

## WORK EXPERIENCE

### **Nowdigiverse, Chishtian, Pakistan (07/2025 – Present)**

WordPress Designer & Team Manager Intern – Designing and customizing responsive WordPress websites while coordinating team tasks. Applied leadership skills to ensure smooth project delivery and impactful results.

### **WSM Solutions.co, Chishtian, Pakistan (02/2025 – 06/2025)**

WordPress Developer – Contributed to client-focused projects by designing and customizing responsive websites. Delivered visually appealing, user-friendly layouts blending creativity with technical expertise.

## SKILLS

**Technical Skills:** WordPress Development, Web Development, HTML, CSS, Bootstrap, JavaScript (Basic), UI/UX Design, Website Optimization

**Tools:** Canva, MS Office, Jira, Trello

**Soft Skills:** Team Leadership, Project Management, Collaboration, Problem Solving, Time Management, Event Management

## VOLUNTEER EXPERIENCE

Kaar-e-Kamal Welfare Foundation (2022 – Present) – Designed pamphlets, activity diagrams, and appreciation templates using Canva. Supported education, health, and welfare initiatives in underserved areas to create a positive social impact.

## SCHOLARSHIP ALIGNMENT

My academic goal is to pursue graduate studies in Software Engineering with a focus on **Artificial Intelligence and Machine Learning**. I am particularly interested in research that bridges software engineering with AI-powered solutions to improve healthcare, education, and social welfare systems.
